Cures viruses	Improved technologies
<p>Operation in an infected system and exceptional resistance to viruses make Dr.Web a stand-out among anti-viruses.</p> <p>Industry pacesetter! Dr.Web has the highest success rate of curing active infections.</p> <p>Dr.Web can be installed in an infected system without any preliminary curing.</p> <p>Dr.Web anti-virus provides multi-level protection of RAM, hard disks and removable devices against viruses, rootkits, Trojans, spyware, adware, hack tools and other malicious programs.</p>	<p>Improved! Scanning speed of Dr.Web has increased by 30% compared with the previous version.</p> <p>New! Dr.Web SelfPROtect makes the anti-virus immune to any attempts of malicious programs to disrupt its operation.</p> <p>Improved! Dr.Web Shield™ protects a system against viruses featuring rootkit technologies.</p> <p>Improved! Origins Tracing™ is a unique non-signature detection technology that allows Dr.Web to detect unknown threats.</p>
Reliable protection of e-mail	Low system requirements
<p>SpIDer Mail® performs a virus scan of all components of a message including archived attachments before it gets into a mailbox.</p>	<p>Dr.Web anti-virus for Windows has very low system requirements and runs smoothly even on low-end hardware. Perhaps you've got a laptop? Then Dr.Web is your only choice!</p>
Friendliness and usability	Always up-to-date
<p>The built-in scheduler allows to set scan time and frequency.</p> <p>Automatic updating of the virus database is also customizable.</p> <p>Dr.Web enables a user to specify actions performed to malicious programs of different types – viruses, spyware, riskware, adware, hack tools, paid dialers, jokers.</p>	<p>Software can be set to update automatically, on-demand or according to a schedule.</p> <p>Update files are downloaded very quickly even if a connection speed is low.</p> <p>There are always available updating servers.</p> <p>No need to restart a computer after updating. Dr.Web starts using the latest virus definitions right away.</p>

Doctor Web

Doctor Web is the Russian IT security software vendor. Dr.Web anti-virus products have been developed since 1992.

3d street Yamskogo polya 2-12A Moscow, Russia 125124
