

Partnership Program for Dr.Web Online-resellers

Doctor Web, Ltd., a Russian company developing **Dr.WEB® Anti-virus** solutions welcomes you to join its online partners' family.

What is Dr.WEB Anti-virus?

Created in the early 90s by **Igor Daniloff**, **Dr.Web** made its debut in "Virus Bulletin" comparative review in 1996 with more than impressive result and 1997 **Dr.Web** was nominated one of the three best anti-viruses in the world according to "Virus Bulletin".

Dr.Web efficiently combines the signature-based detection methods with high-level heuristics and behaviour-analysing techniques to block any intrusion attempt whatever its source might be. Impressively compact and resource-sparing, **Dr.Web** detects and neutralizes viruses which never exist as files, conducting their destructive activity only in memory.

Speedy anti-virus signature response to new threats goes up to twice per hour frequency at periods of high malware outbreaks.

Our customers

High-end technology implemented in the product line of the **Dr.Web** family protects file and mail servers, standalone workstations, corporate networks and Internet gateways worldwide. **Dr.Web's** anti-virus technologies are available in a variety of solutions targeting both SMB customers and nation-wide networks.

Dr.Web protects file servers of **Parliament of Russian Federation, Ministry of Defense, Ministry of Foreign Affairs**, as well as large businesses and data storages of universities and research institutes. Large national Telecoms choose **Dr.Web** for mail servers for its high-performance, stable operation and irreproachable detection.

State certificates and awards received by the **Dr.Web Anti-virus**, as well as the geography of our users are the best evidence of exceptional trust to the products created by the talented Russian programmers.
